Breed(s) of animal	Holstein		
Changed rules to define breed codes¹⁾	No		
Change of distinct ID number ranges²⁾ for			
breeds:	Yes <input type="text"/>	No <input type="text" value="0"/>	If yes please state valid number ranges for eachbreed
sexes:	Yes <input type="text"/>	No <input type="text" value="0"/>	If yes please state valid number ranges for each sex
birth years:	Yes <input type="text"/>	No <input type="text" value="0"/>	If yes please state valid number ranges for each birth year
regions/herds:	Yes <input type="text"/>	No <input type="text" value="0"/>	If yes please state valid number ranges for regions/herds
others :			

¹⁾ 3 character code

²⁾ 12 character code

Reference :

We had assigned ranges like country of origin, sex, pedigree depth code to ID number. But since 1998, We are only using serial number for Domestic animals and ID NUMBER begun from 500000000 and using ID number of country of origin and assigning THE Origin code for Foreign animals.

Ex) (Domestic) The past : 1 1 03 00187016 --> Current : 500187016

① ② ③

(foreign) The past : 220300164224 --> Current : 0 2 0000164224

④

① Country of origin ② Sex ③ Pedigree depth ④ Country of origin
