Name of bull, herdbook number, breed, ISO country code (EE),  
 registration number, date of collecting of semen, name of AI  
 organisation,  
 number of certificate of AI organisation (10/1),  
 bar code (including number of ejaculate)

**National vs international ID**

National unique identification of animal is generated by the system (in  
 the case of Oracle by Sequence).  
 International ID is generated every time before international evaluation,  
 using animal's  
 breed code (see above), ISO country code (3 char code based on  
 iso\_3166), sex, registration\_number (ear tag number)
