Genotype Data Exchange (GenoEx-GDE)

Genotype Data Exchange (GenoEx-GDE)

- Requests for prompt implementation of GenoEx-GDE have been received from current Interbull Service Users:

  - Application to InterGenomics and Interbeef.

  - Smaller Holstein populations, not involved with international consortia, for centralized exchange of SNP genotypes and possibly international genomic predictions (similar to Brown Swiss InterGenomics)

- Therefore, development of **Genomic Data Exchange (GenoEx-GDE)** services will be next priority
